

## Index

- AGUIRRE-URRETA M.B., (with L.A. BUATOIS, G. CH.B. CHERNOGLASOV and F.A. MEDINA) 157-162  
algae,  
snow algae, 143-148  
alkaline picrite,  
spinel-garnet lherzolite nodules, 321-330  
Amanda Bay,  
diet of emperor penguin, 23-28  
Ameghino Formation,  
Jurrassic Polychelidae, 157-162  
Amery Oasis,  
geology of Radok Lake area, 53-66  
ANDRONIKOV, A.V., 321-330  
Antarctic and subantarctic fur seals, 309-312  
Antarctic Peninsula,  
seismic reflection investigations, 223-234  
Antarctic winds,  
General Circulation Model performance, 287-300  
*Antarcticheles*, 157-162  
*Aptenodytes*, diet, 23-28  
*Arctocephalus gazella*, 309-312  
Artedidraconidae,  
demersal fish fauna of the Weddell Sea, 129-137  
ATKINSON, A., (with P. WARD, J. M. PECK & A. G. WOOD) 43-52  
atmospheric pollution, signals, 189-205  
attendance behaviour,  
fur seal females, 309-312
- B-9 iceberg,  
calving and drift in the Ross Sea, 234-257  
bacterial microflora,  
crude oil effects on marine bacteria, 123-127  
BARALDO, A. (with J. MARTI) 345-352  
BARNETT, D., (with H. KEYS and S.S. JACOBS) 243-257  
barotropic tide,  
one-dimensional mixed layer model, 29-42  
BARRERA-ORO, E.R. (with R.J. CASAUX) 207-213  
BARRY, R.G. (with J.A. MASLANKI) 105-121  
BARTLETT, P.A., (with M.N. BESTER), 309-312  
base surges,  
pre-caldera pyroclastic deposits, 345-352  
Bathymraconidae,  
demersal fish fauna of the Weddell Sea, 129-137  
Beacon Supergroup,  
Early Permian palynoflora from Milorgjella, 331-344  
Beardmore Glacier,  
Triassic vertebrate fauna, 163-167  
Beaver Lake graben,  
geology of Radok Lake area, 53-66  
BELOV, B.A. (with V.O. PAPASHVILI, Y.A.I. FELDSTEIN, L.I. GROMOVA and T.E. VALCHUK), 267-276  
benthic organisms,  
diet of cormorants, 139-141  
BERGSTROM, D.M., (with V.R. SMITH), 301-308  
BESTER, M.N., (with P.A. BARTLETT), 309-312
- biogeography,  
isopod genus *Echinozone*, 215-219  
biomass,  
demersal fish fauna of the Weddell Sea, 129-137  
BLOCK, W., (with GRIFFIN, C.T. and M.J. DOWNES) 221-222  
book reviews,  
*Antarctic Cenozoic History from the CIROS-1 drillhole, McMurdo Sound*, reviewed by P.J. Butterworth, 277-278  
*Antarctic Palaeobiology - its role in the reconstruction of Gondwana*, reviewed by J. Chapman 175  
*Antarctic Scleractinia, Synopses of the Antarctic Benthos Vol 1*, reviewed by J. Ryland, 363  
*Carbon Dioxide and Global Change: Earth in Transition*, reviewed by J. Farman, 362-363  
*Chronological list of Antarctic expeditions and related historical events*, reviewed by A. Savours, 177  
*Limnological Studies in Queen Maud Land (East Antarctica)*, reviewed by R. Wharton 361  
*Origin and evolution of the Antarctic biota*, reviewed by J.D. Hudson, 175-176  
*Rotifer Symposium V.*, reviewed by H. Heatwole, 278-279  
*The environmental record in glaciers and ice sheets* reviewed by E.W. Wolff, 361-362  
*The Frozen Earth*, reviewed by C. Harris, 93  
*The Pinnipeds: seals, sea lions and walruses*, reviewed by I. Boyd, 362  
*The role of Antarctica in global change. Scientific priorities for the International Geosphere-Biosphere Programme (IGBP)*, reviewed by O.W. Heal, 92-93  
*Waste disposal in the Antarctic*, reviewed by A. Porteous, 91  
bottom ablation,  
one-dimensional mixed layer model, 29-42  
Boyd, I.,  
review of *The Pinnipeds: seals, sea lions and walruses*, 362  
BRANDT, A., 215-219  
Bransfield Strait,  
seismic reflection investigations, 223-234  
BUATOIS, L.A. (with M.B. AGUIRRE-URRETA, G. CH.B. CHERNOGLASOV and F.A. MEDINA) 157-162  
Budd Coast,  
snow algae, 143-148  
BURTON, H.R., (with K. GREEN, R. WILLIAMS, E.J. WOEHLER, N.J. GALES and R.T. JONES) 139-141  
Butterworth, P.J.  
review of *Antarctic Cenozoic History from the CIROS-1 drillhole, McMurdo Sound*, 277-278  
calving and drift of iceberg B-9, 234-257
- CASAUX, R.J., (with E.R. BARRERA-ORO) 207-213  
Cenozoic  
geology of Radok Lake area, 53-66  
history of Antarctica, 3-21  
Chapman, J.L.,  
review of *Antarctic Paleobiology - its role in the reconstruction of Gondwana*, 175

- chemiluminescent analyzer,  
surface layer ozone, 169-174
- CHERNOGLASOV, G. Ch.B., (with M.B. AGUIRRE-URRETA, L.A.  
BUATOIS and F.A. MEDINA) 157-162
- climate,  
improvements in General Circulation Model performance, 287-300  
Mawson - a strong wind site, 78-89  
remote sensing in Antarctica and the Southern Ocean, 105-121
- COLLINSON J.W., (with HAMMER, W.R. and W.J. RYAN III) 163-167
- Colpoda cucullus*,  
under fluctuating temperatures, 312-320
- cormorants,  
Heard Island, 139-141
- Croxall, J.P., 1  
crude oil,  
effects on marine bacteria, 123-127
- Crustacea,  
isopod genus *Echinozone* Sars 1897, 215-219  
decapods,  
Jurassic polychelidae, 157-162
- Deception Island,  
pre-caldera pyroclastic deposits, 345-352
- DELILLE, D., (with N. VAILLANT) 123-127
- demersal fish fauna of the Weddell Sea, 129-137  
depositional regime,  
snow accumulation in Eastern Wilkes Land 235-242
- Desmidaceae,  
snow algae of the Windmill Islands, 143-148
- diet,  
feeding selectivity in *Notothenia neglecta*, 207-213  
distribution,  
demersal fish fauna of the Weddell Sea, 129-137
- DOWNES, M.J., (with GRIFFIN, C.T. and W. BLOCK) 221-222  
drifting ice,  
remote sensing in Antarctica, 105-121
- Early Permian palynoflora from Milorgfjella, 331-344  
East Antarctica,  
review of the climate of Mawson, 79-89
- EKAU, W., 129-137  
euphausiids,  
life cycles and distribution, 43-52
- Farman, J.,  
review of *Carbon Dioxide and Global Change: Earth in Transition*, 362-363
- FELDSTEIN Y.A.I., (with V.O. PAPITASHVILI, B.A. BELOV, L.I.  
GROMOVA and T.E. VALCHUK), 267-276
- fish,  
diet of Heard Island cormorant, 139-141  
feeding selectivity in *Notothenia neglecta*, 207-213
- fossils,  
fish remains from the Santa Marta formation, 67-76
- flora,  
alien vascular flora of Marion and Prince Edward Islands, 301-308
- Fremouw Formation,  
Triassic vertebrate fauna, 163-167
- frilled shark,  
fish remains from the Santa Marta formation, 67-76
- fur seals,  
Antarctic and subantarctic, 309-312
- GALES, N.J. (with K. GREEN, R. WILLIAMS, E.J. WOEHLER, H.R.  
BURTON, and R.T. JONES) 139-141
- GAMBLE, J.A. (with J.L. SMELLIE, W.C. MCINTOSH AND K.T.  
PANTER) 353-354
- General Circulation Models,  
improvements in performance, 287-300
- generators,  
unmanned magnetometer stations, 353-359
- geology,  
Shackleton Range, 265-266
- geomagnetism,  
equivalent ionospheric currents, 267-276
- geophysics,  
seismic reflection investigations, 223-234
- geothermobarometry,  
spinel-garnet lherzolite nodules, 321-330
- glacial history,  
in Cenozoic Antarctica, 3-21
- glaciology,  
remote sensing in Antarctica, 105-121
- global change,  
Cenozoic history of Antarctica, 3-21
- Gondwana,  
Cenozoic history of Antarctica, 3-21
- Goodwin, I.D., 235-242
- GRAPE TEAM, 223-234
- GREEN, K., (with R. WILLIAMS, E.J. WOEHLER, H.R. BURTON, N.J.  
GALES and R.T. JONES) 139-141
- greenhouse gases,  
signals of atmospheric pollution, 189-205
- GRIFFIN, C.T., (with M.J. DOWNES and W. BLOCK) 221-222
- GROMOVA, L.I. (with V.O. PAPITASHVILI, Y.A.I. FELDSTEIN, B.A.  
BELOV and T.E. VALCHUK), 267-276
- GUY-OHLSON, D. (with K. LARSSON, and S. LINDSTROM) 331-344
- HAMMER, W.R., (with J.W. COLLINSON and W.J. RYAN III) 163-167
- Harris, C.,  
review of *The Frozen Earth*, 93
- Heal, O.W.,  
review of *The role of Antarctica in global change. Scientific priorities for the International Geosphere-Biosphere Programme (IGBP)*, 92-93
- Heard Island  
diet of cormorants, 139-141
- Heatwole, H.,  
review of *Rotifer Symposium V.*, 278-279
- Heteromita globosa*,  
under fluctuating temperatures, 312-320
- Heterorhabditidae,  
parasitic nematodes, 221-222

- Hudson, J.D.,  
review of *Origin and evolution of the Antarctic biota*, 175-176
- HUGHES, J. (with H.G. SMITH and S.J. MOORE) 312-320
- hydrocarbon degradation,  
crude oil effects on marine bacteria, 123-127
- hydromagnetism,  
pre-caldera pyroclastic deposits, 345-352
- ice shelf processes,  
remote sensing in Antarctica, 105-121
- icebergs,  
as tracers of water movement, 259-263  
drifting B-9 in the Ross Sea, 243-257
- Iles Kerguelen,  
crude oil effects on marine bacteria, 123-127
- interplanetary magnetic field,  
equivalent ionospheric currents above Antarctica, 267-276
- inversion strength,  
General Circulation Models, 287-300
- Isopoda,  
*Echinozone*, 215-219
- JACOBS, S.S., (with H. KEYS and D. BARNETT) 243-257
- James Ross Island,  
fish remains from the Santa Marta formation, 67-76
- Jurassic Polychelidae, 157-162
- Jetty Peninsula,  
spinel-garnet lherzolite nodules, 321-330
- JONES, R.T.,  
(with K. GREEN, R. WILLIAMS, E.J. WOEHLER, H.R. BURTON, and N.J. GALE) 139-141
- Jurassic,  
Polychelidae, 157-162
- katabatic winds  
climate of Mawson, 78-89  
snow accumulation in Eastern Wilkes Land 235-242
- KEYS, J.R. (HARRY), (with S.S. JACOBS and D. BARNETT), 243-257
- KLAGES, N.T.W., (with N.J. GALE, R. WILLIAMS & E.J. WOEHLER), 23-28
- krill,  
euphausiid life cycles and distribution, 43-52
- LARSSON, K. (with S. LINDSTROM and D. GUY-OHLSON) 331-344
- Late Cretaceous,  
fish remains from the Santa Marta Formation, 67-76
- LINDSTROM, S. (with K. LARSSON and D. GUY-OHLSON) 331-344
- LING, H.U., (with R.D. SEPPELT) 143-148
- lipid levels,  
Antarctic sea ice microalgae, 149-155
- Lugg, D.J., 187
- MADEJSKI, P. (with S. RAKUSA-SUSZCZEWSKI), 259-263
- MCINTOSH, W.C. (with J.L. SMELLIE, J.A. GAMBLE AND K.T. PANTER) 353-354
- magnetometer network,  
unmanned stations, 353-359
- magnetosphere,  
equivalent currents above Antarctica, 267-276
- Marie Byrd Land,  
preliminary stratigraphy, 353-354
- marine invertebrates,  
isopod genus *Echinozone*, 215-219
- Marion Island,  
alien vascular flora, 301-308
- MARTI, J. (with A. BARALDO) 345-352
- MASLANIK, J.A. (with R.G. BARRY) 105-121
- mass balance,  
General Circulation Model performance, 287-300
- maternal adaptation,  
fur seal females, 309-312
- MCKELVEY, B.C. (with N.C.N. STEPHENSON), 53-66
- MEDINA, F.A., (with M.B. AGURRE-URRETA, L.A. BUATOS and G. CH.B. CHERNOGLASOV) 157-162
- Mesotaeniumpbergrenii*,  
in Windmill Islands, 143-148
- meteorology,  
review of the climate of Mawson, 79-89
- microclimates,  
terrestrial protozoa under fluctuating temperatures, 312-320
- Milorgfjella,  
Early Permian palynoflora, 331-344
- modelling,  
improvements in General Circulation Models, 287-300  
beneath Ross Ice Shelf, 29-42
- MOORE, S.J. (with H.G. SMITH and J. HUGHES) 312-320
- nematodes,  
tests of Antarctic soils, 221-222
- nile red stain,  
neutral lipid levels in sea ice microalgae, 149-155
- Notothenia neglecta*,  
feeding selectivity, 207-213  
demersal fish fauna of the Weddell Sea, 129-137
- ocean currents,  
calving and drift of iceberg B-9, 234-257
- OLBERS, D.J. (with M. SCHEDUKAT) 29-42
- otoliths,  
diet of Heard Island cormorant, 139-141
- ozone,  
above Weddell Sea, 169-174
- palaeoclimate,  
in Cenozoic Antarctica, 3-21
- palaeoecology,  
Jurassic Polychelidae, 157-162
- palagonitization,  
pre-caldera pyroclastic deposits, 345-352
- PALMISANO, A.C., (with J.C. PRISCU, L.R. PRISCU, and C.W. SULLIVAN), 149-155
- palyontology  
Early Permian palynoflora from Milorgfjella, 331-344
- PANTER, K.T. (with J.L. SMELLIE, W.C. MCINTOSH and J.A. GAMBLE) 353-354

- PAPITASHVILI, V.O., (with Y.A.I. FELDSTEIN, B.A. BELOV, L.I. GROMOVA and T.E. VALCHUK), 267-276
- parasites,  
  Antarctic soils, 221-222
- PICK J.M., (with P.WARD, A. ATKINSON, & A.G. WOOD) 43-52
- Permian Amery Group,  
  geology of the Radok Lake area, 53-66
- Permian arkoses, 53-66
- Phalacrocorax atriceps nivalis*,  
  diet, 139-141
- plant distribution,  
  alien vascular flora of Prince Edward Islands, 301-308
- Pleuragramma antarcticum*,  
  emperor penguin diet in Amanda Bay, 23-28
- pollution,  
  in polar snow and ice, 189-205
- polychaetes,  
  diet of Heard Island cormorant, 139-141  
  Jurassic Polychelidae, 157-162
- population structure,  
  euphausiid life cycles and distribution, 43-52
- Porteous, A.  
  review of *Waste disposal in the Antarctic*, 91
- Potter Cove,  
  feeding by *Notothenia neglecta*, 207-213
- pre-caldera pyroclastic deposits, 345-352
- prey,  
  diet of Heard Island cormorant, 139-141  
  emperor penguin diet in Amanda Bay, 23-28
- Prince Charles mountains,  
  geology of the Radok Lake area, 53-66
- Prince Edward Islands,  
  alien vascular flora, 301-308
